Line 3 IAMC: Boots on the Ground –
Indigenous Monitoring Program

November 17, 2021

Canada 

How did we get here?

THE LINE 3 REPLACEMENT PROJECT (L3RP)

Program Goal: A New Partnership

Opportunity created in Terms of Reference

□ *“Section 10: Committee activities may include monitoring, identifying Monitors to accompany and advise CER Inspection Officers”*

Aim is to integrate Indigenous knowledge, values, and perspectives into regulator’s inspections and oversight

□ Indigenous protection and stewardship of culture, lands, and waters

New type of monitoring for Indigenous Peoples – working with a regulator

Indigenous Monitors' Role

Inspection Process - Overview

Indigenous Monitors' Role

IAMC Monitors and CER Inspection Officers during training

Achievements to Date

- **Building a new partnership**
 - ✓ Learning from each other
- **Indigenous boots on the ground, protecting our interests**
 - ✓ 10 Indigenous Monitors trained
 - ✓ 40 joint-inspections and counting

In 2019-2020,
approximately 88% of
the pipeline corridor
was monitored by
IAMC Monitors.

Achievements to Date

- **Direct reporting**
 - ✓ Detailed reports posted to iamc-line3.com/monitoring
 - ✓ Engagement with Elders and Leadership
- **Building capacity**
 - ✓ In Employers and Monitors
 - ✓ In CER to understand and integrate Indigenous perspectives
 - ✓ Through emergency management response exercises

Challenges

- Navigating uncharted territories
- Creating new processes & precedents
- Fostering reciprocity

Decommissioning Challenges

- Difficulty getting IM boots on the ground

- Factors at play
 - Regulation
 - Land owners permission
 - Minimal CER routine inspections
 - Different perception of risk

- Building understanding and working for solutions

Decommissioning Activities in 2021-2022 (Manitoba)

- 1 joint inspection with Enbridge
- 1 table top emergency response exercise
- 1 full scale emergency response exercise
- 4 Compliance Verification Activities with the CER
 - 3 in Manitoba
 - 1 in Saskatchewan

Decommissioning in 2022-2023

□ Landowner Strategy

- Relationship building
- Access to land

□ Joint inspections

- Decommissioning monitoring with Enbridge
- Compliance verification with the CER

□ Alberta and Saskatchewan

Outcomes & benefits

- Improving outcomes and oversight
- Bringing Indigenous voices to the table
- Partnership with the CER
- Raising the bar for future projects

Outcomes & benefits

Indigenous Advisory and Monitoring
Committee Monitoring Report

By: Jade Dewar, IAMC Indigenous Monitor

Successes, challenges, and lessons learned:

- Training
- Capacity Building
- Engagement
- Relationships

Next Steps

- Hosting a workshop with Indigenous Nations on Monitoring
- Getting IAMC IM's boots on the ground for Enbridge's decommissioning activities in 2022
- Developing a chance finds protocol for Monitors on inspections
